1. SysInfoTools PDF Protection v2.0

1.1 Overview

PDF Protection from SysInfoTools is very flexible and powerful tool that allows you to impose various security parameters to your pdf file easily. PDF Protect Tool from SysInfoTools is stand-alone application, which means that Adobe Acrobat (or any other product) is not required.

PDF Protection from SysInfoTools is 100% result oriented and very fast than any other PDF protection imposer tool. It does not modify the existing content of the file and keep the document original as before. This sophisticated software tool take a simple PDF file as input and create a copy of it for user's security(users original document's accessibility is out top priority), then it perform security insertion operations on the copy of original. Within seconds, this tool does all the desired operations.

Key Features of PDF Protection: -

- Easy to use, Highly Interactive Graphical User Interface.
- Compatible with Windows 7, Vista, 2003, XP, and 2000.
- No extra technical skills required.

- Supports output file security.
- Supports imposing of various security parameters on PDF file.
- Stand-alone application i.e. does not require Adobe Acrobat or Reader installed.
- Install/uninstall support.
- Free Demo Version.

1.2 Getting Started

- [Installation Procedure](#)(See 1.2.1)
