|  | Open the User's Help guide of SysInfoTools PST Compress and Compact. |
| | <ul style="list-style-type: none"> • Help:- Select this option to view Help manual of the software. • Software Homepage:- Select this option to visit the Software webpage. • About :- Select this option to view version information and software support details of the software. |

5.3 How to Use the Software

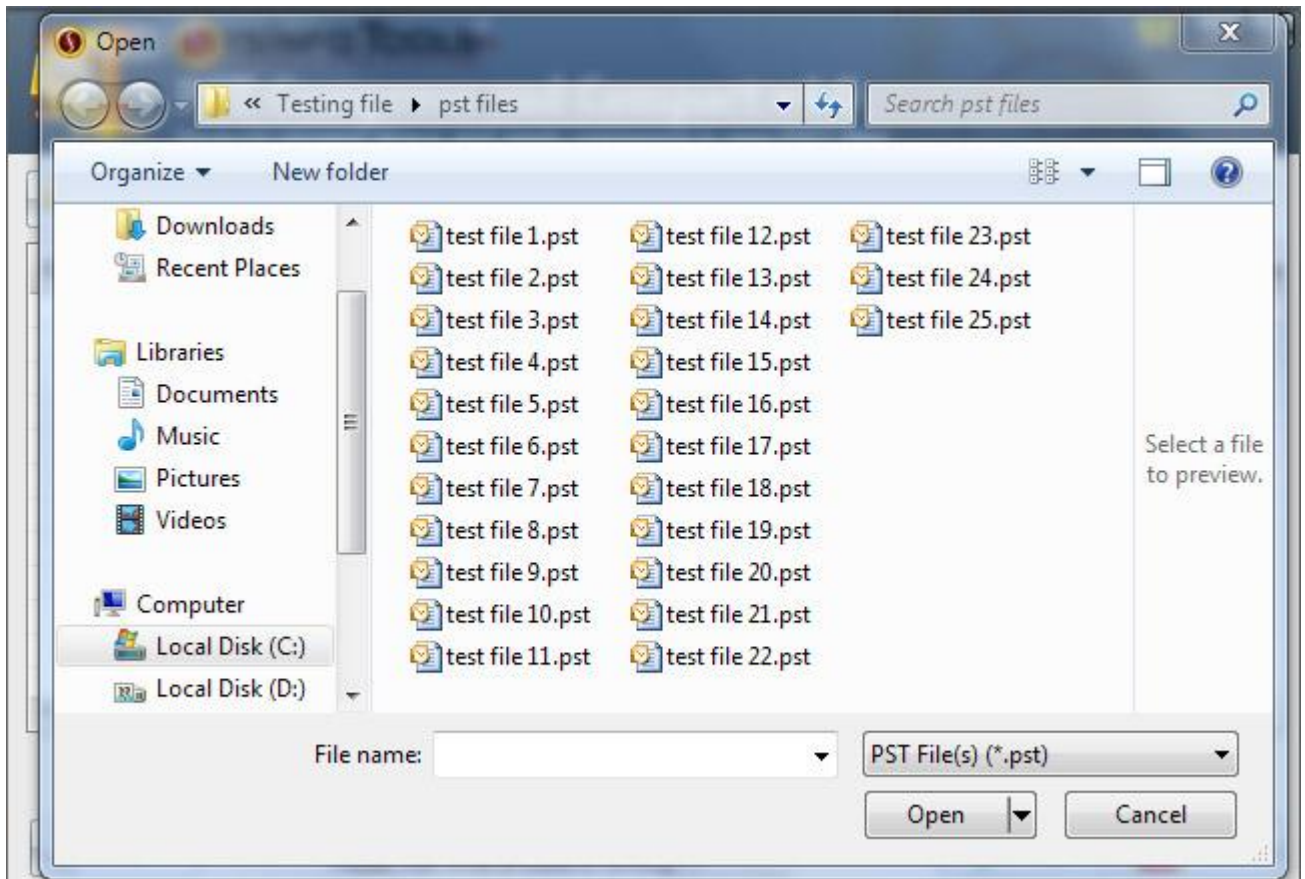

1. Launch SysInfoTools PST Compress and Compact software, main window of software will launch on your screen.

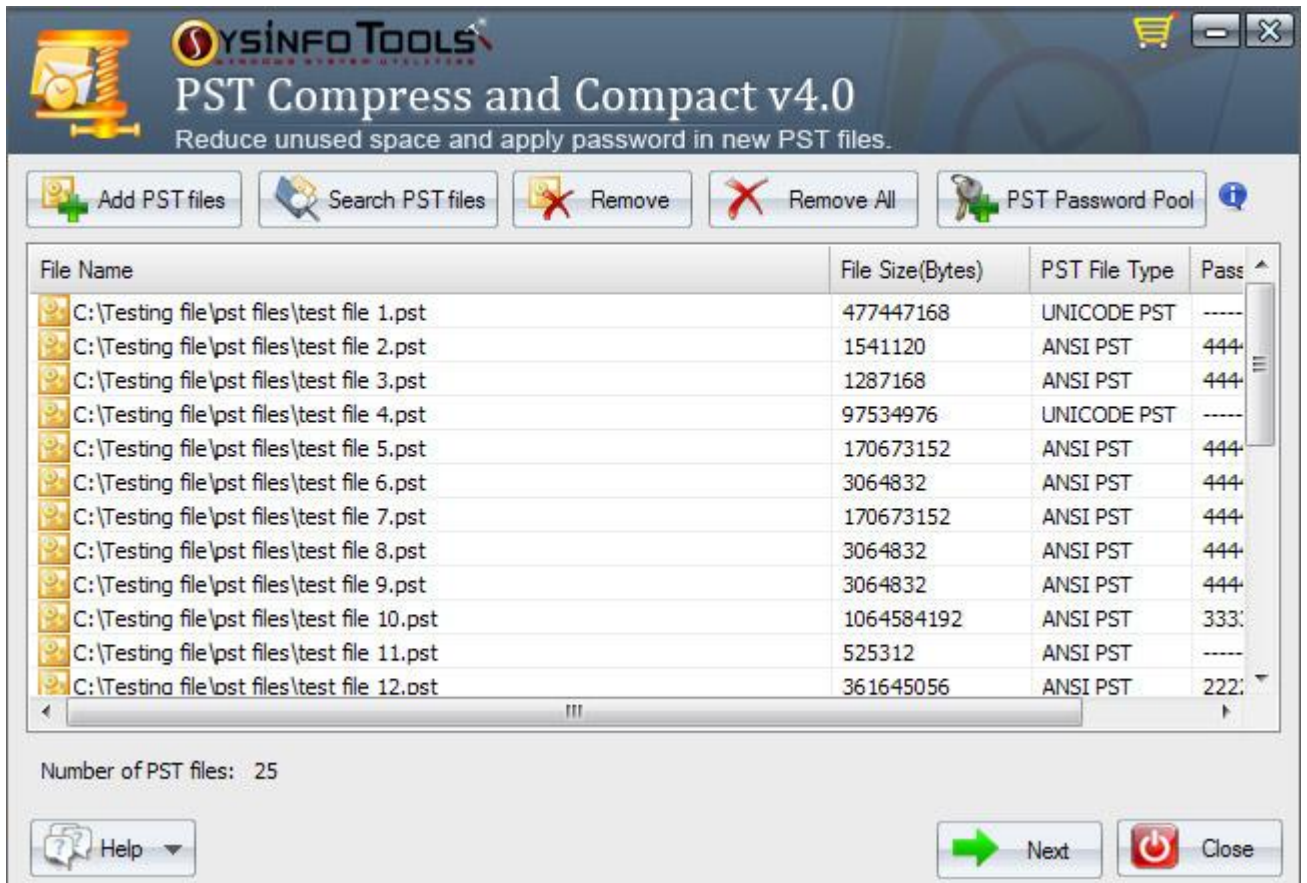

2. If your PST files are password protected then Click **PST Password Pool** button to add possible PST files password in the list before adding PST files in the list

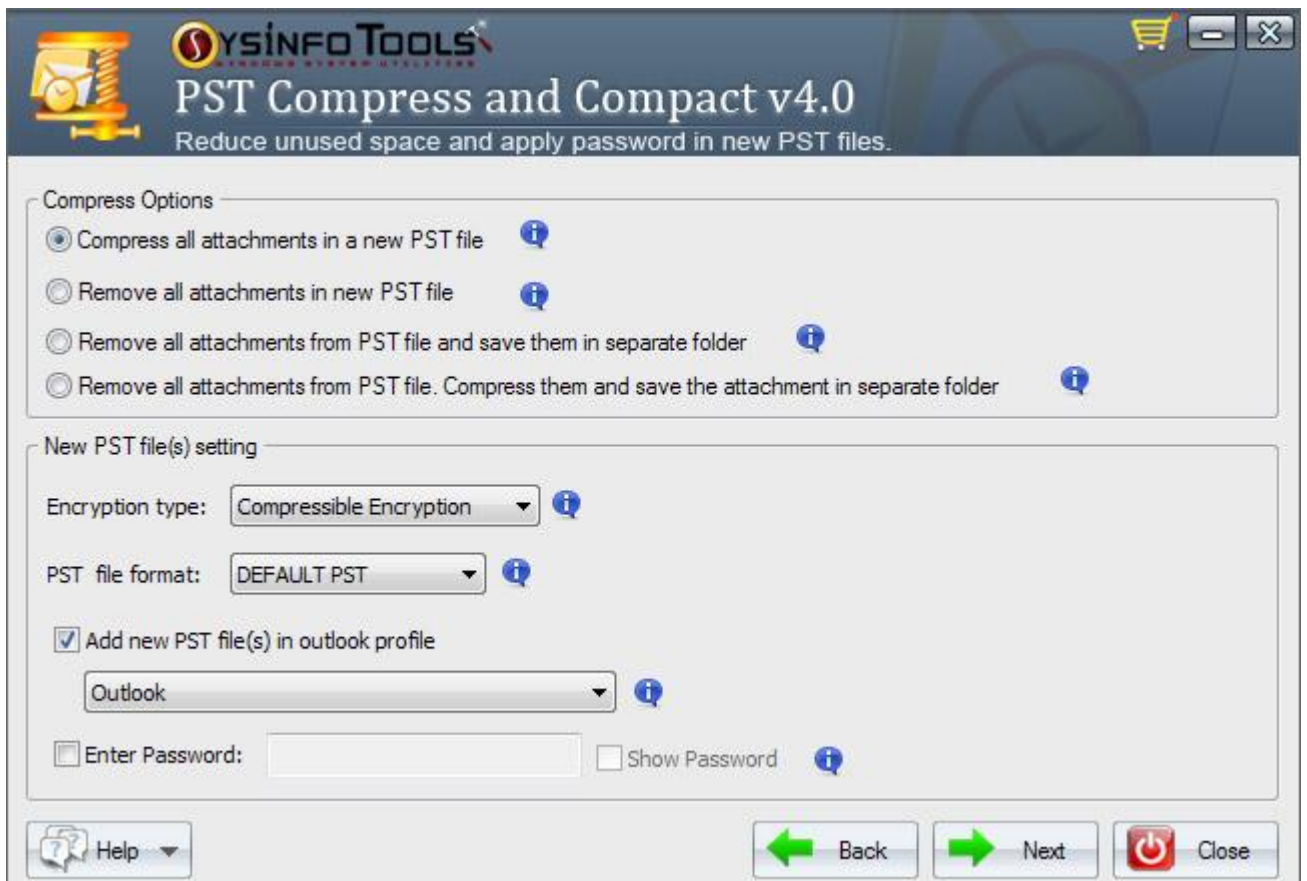

3. All the selected files are listed in the main window along with their size, file type and password, after then click on **Next** button:

- Selected PST file is listed in the list, then click **Next** button to continue the process.

- Now Select the Compression Option to compress the PST files.

Four options are available with SysInfoTools PST Compress and Compact to let you compress the selected PST files:-

- **Compress all attachments in new PST file** – This option will create a new PST file and copy all contents (e-mail, contacts, appointments etc.) of source PST file including attachments to a new PST file, But difference is that it will compress all attachments in New PST file. Remember that your original MS outlook PST file will remain Intact.

- **Remove all attachments in new PST file** – This option will create a new PST file and copy all contents (e-mail, contacts, appointments etc.) of source PST file except attachments to a new PST file. Remember that your original MS outlook PST file will remain Intact.

- **Remove all attachments from new PST file and save them in separate folder** – The difference between this option and previous option is that previous option will store attachments in a compress form while this option will store them as it is. This option will removes all attachments from source PST file and copy all its contents (e-mail, contacts, appointments etc.) except attachments to a new PST file, it will ask you a separate folder's location and store attachments in original form. Remember that your original MS outlook PST file will remain Intact.

- **Remove all attachments from PST file. Compress them and save the attachment in separate folder** – This option will create a new PST file and copy all contents (e-mail, contacts, appointments etc.) of source PST file except attachments to a new PST file; it will ask you the location of a separate folder and store attachments in compressed form. In this way it reduces the size of your new PST file and save disk space both. Remember that your original MS outlook PST file will remain Intact.

Encryption type :-This is a special property of MS Outlook PST files, which create new PST file(s) in compressed mode.

- **Compressable Encryption mode:** option encodes your .pst file in a format that allows compression, but the .pst file is compressed only if you have a compression program on your computer.
- **Best Encryption mode:** option encodes your .pst file in a format that offers increased protection. If you have a disk-compression program, the .pst files can be compressed.
- **No Encryption mode:** option does not encode your .pst file.

PST file Format:-

SysInfoTools PST Compress and Compact v4.0

- Default selection will create new PST file(s) format as its source PST file format.
- Unicode selection will create new PST (files) in Unicode format irrespective of PST files format.
- Ansi selection will create new PST file(s) in Ansi format irrespective of PST file format.

Add new PST file(s) in outlook profile:-

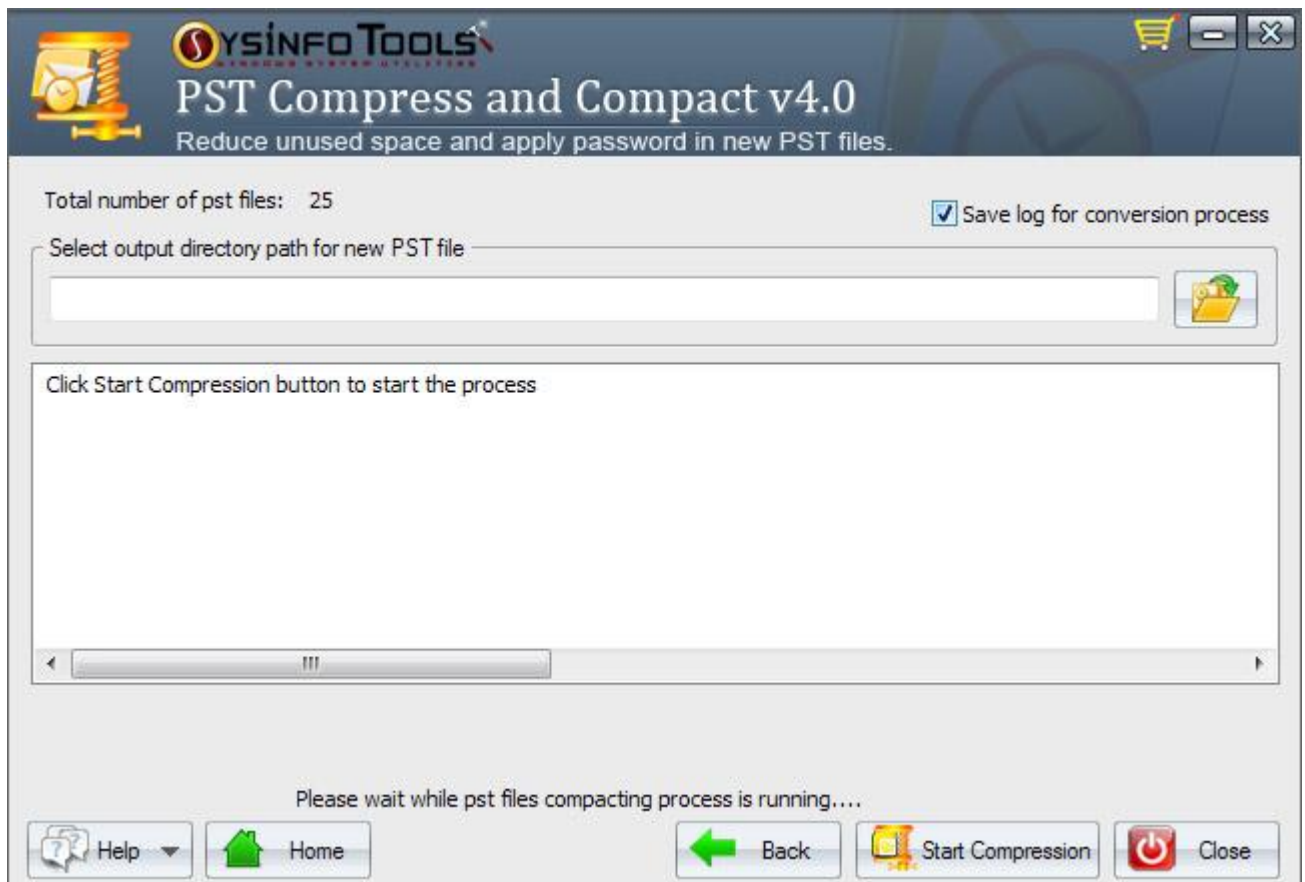

- If you want to attach new PST files in outlook profile then select "**Add new PST file(s) in outlook profile**".

Enter Password:-

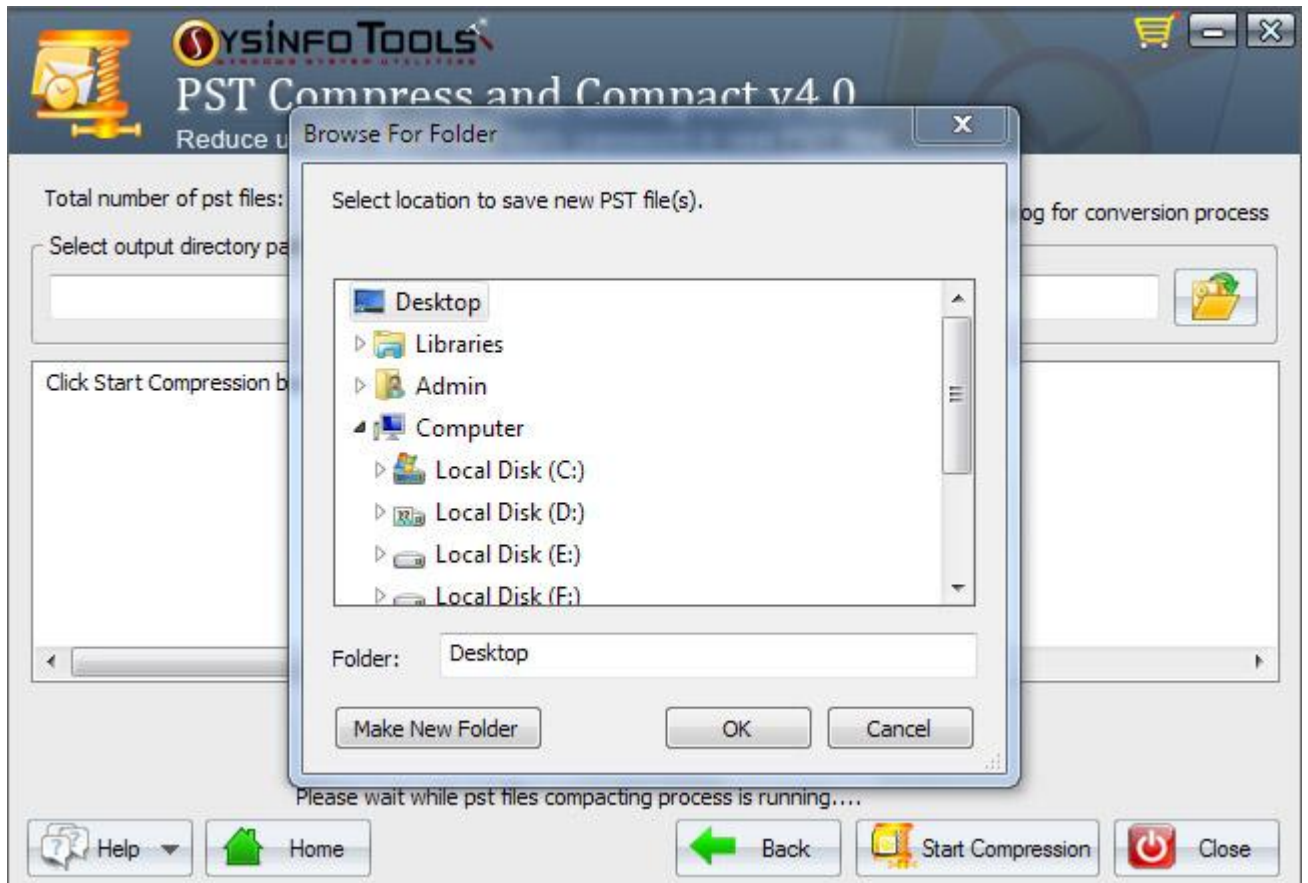

- If you want to create password protected PST files then enter password for new PST files, same password will be apply in new PST files.

After selecting the option according to your need click on the **Next** button.

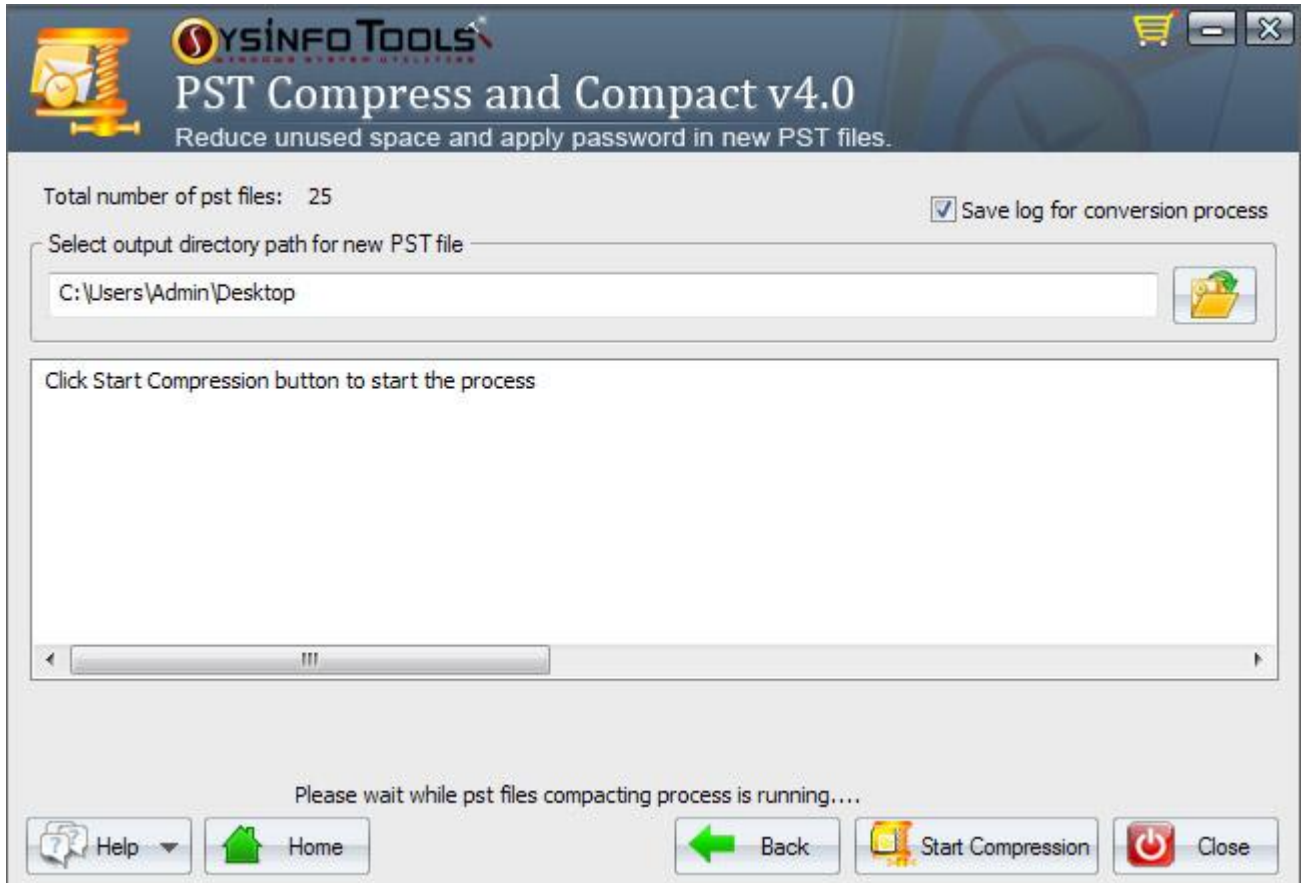

6. Click on **Browse** button to select the destination folder where you want to save the new PST files .

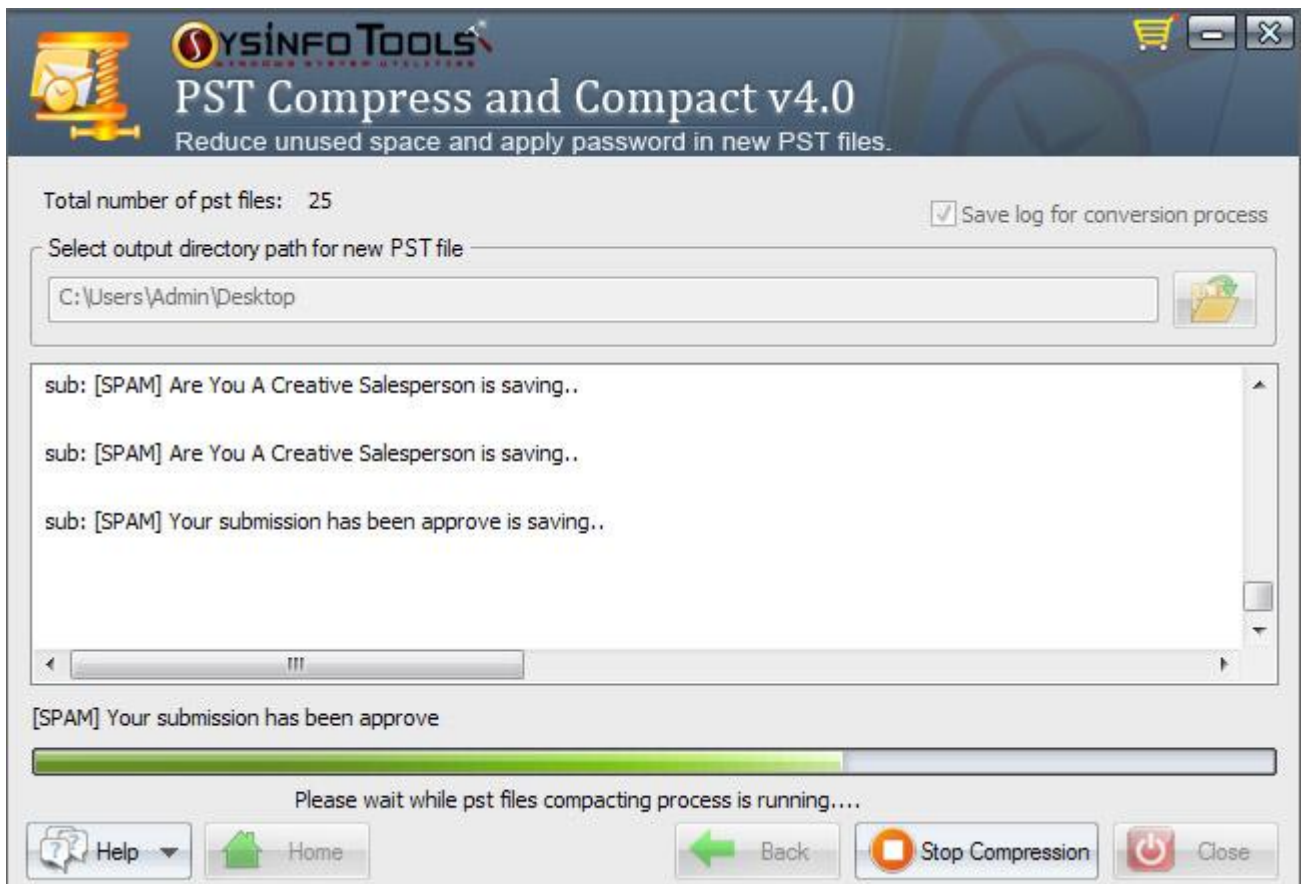

7. In this step select the desired destination folder and click on **OK** button.

8. Selected destination folder path is shown in the editbox. Now click **Start Compression** button to create new PST files.

9. Please wait while process is running on your system.

10. Compression Process is completed. Click on the blue link to see the destination folder where compressed files are saved.
