1. SysInfotools PST Split

2. Overview

SysInfoTools Software has updated its advanced PST split tool from v3.0 to v4.0. The updated version of this tool is more powerful than its later release. This tool will allow users to split a large-sized Outlook PST file into multiple smaller parts without causing any damage or changes, i.e. in a safe mode. It provides you multiple splitting options, such as: split PST file by size, split PST file by date, split PST file by sender email ID, create single PST file for selected folders, and create separate PST file for every selected folders. Using this tool, users can save their output files at user-defined location. It will also allow you to password-protect your new PST files as well as it can help you add/attach the new PST files to your Outlook profile.

Key features of SysInfoTools PST Split tool are:

- Splits large-sized Outlook PST file into multiple smaller parts in a safe manner;
- Performs splitting process of selected PST file in a very quick time;
- Provides various options for splitting PST file, such as: split PST file by size, by date and by sender email ID;
- Creates single PST or separate PST file for selected or every selected folders respectively (optional);

- Allows user to password-protect the output files and enables encryption in them;
- Users can add/attach their new PST files to their Microsoft Outlook profile;
- Highly interactive and user-friendly interface, i.e. no technical knowledge is required;
- Supports all major versions of Microsoft Outlook and Windows operating systems;
- Available with demo version for free evaluation purpose.

Multiple options for splitting an Outlook PST file are:

- **Split PST file by size:** If you want to split your Outlook PST file by size (MB/GB), you can select this option. It will ask you to define a particular size of which you want to split your selected file. For e.g. if you select 10 MB, the selected file will be split into multiple parts of 10 MB each.
- **Split PST file by date:** If you want to split your Outlook PST file by date, you can select this option. It will provide you two different options: "predefined time period" and "define time period manually". In predefined time period, you can select any time period given in the options. Or you can define a time period by yourself. You need to select a date range from the calendar and then you can add it to the list. You can select multiple date ranges and add them to your list before splitting.
- **Split PST file by sender email ID:** If you want to split your Outlook PST file by sender email ID, you can select this option. It will provide you a list of the email IDs from which you have received the emails. You can select the sender email IDs from the list (all are selected by default) of which you want to split your PST file.

Important note: Before you can split the PST files using this tool, make sure they are not corrupted. If they are corrupted, you need to repair them first. You can try advanced [PST File Repair](#) tool of SysInfoTools Software to repair the corrupted PST files.

3. Getting Started

- [Installation Procedure](#)(See 3.1)
- [Order And Activation](#)(See 4.)

3.1 Installation procedure

To install **SysInfoTools PST Split** tool, follow the steps given below:

1. Download demo version of the software setup (executable file or .exe) from the page linked below:

www.sysinfotools.com/recovery/pst-split.html
2. Double-click the setup to install the software on your system.
3. Follow the steps on the setup wizard to install the software on your system.
4. After a successful completion, the setup wizard will pop-up the message of setup completion on your monitor screen.
5. Now click **Finish** to launch the software on your system.

Note: Microsoft Outlook must be installed on your system in order to use **SysInfoTools PST Split** tool.

4. Order and Activation

- [How to Order](#)(See 4.1)
- [How to Activate](#)(See 4.2)

4.1 How to Order

The software can be purchased by making online payments. Click on the link shown below to have a look at the pricing details and to place an order.

www.sysinfotools.com/buynow/pst-split.html

Once the payment is received, an order number is sent to you via e-mail.

4.2 How to Activate

As you purchase the software, an Order Number is generated and provided to you. This order number has to be entered in the Registration window of the full version of PST Split tool.

SysInfoTools PST Split

- Open **SysInfoTools PST Split** software in your system, software registration dialog will pop-up on your screen to enter software authentication key.

- Click the "**I don't have Authentication Code**" check box, following fields will be displayed in the registration dialog:

Email Address: In this field, you need to enter your email address, which you have used to register **PST Split** software.

Order Number: In this field, you need to enter the Order Number which has been provided to you at the time of purchasing the software.

Path to save the file: Select the path where you want to save the .info file which is generated after clicking on "**Get Authentication Code**", by default .info file will be saved on the desktop of your system.

Send this **.info file** generated by the software at sales@sysinfotools.com, after getting .info file the sales department will send you software activation key within a couple of minutes.

For any software related queries email at: support@sysinfotools.com

You agree to hold SysInfoTools Data Recovery harmless from any and all claims or losses relating to such unauthorized use.

8. Technical Support

We provide 24/7 online support to solve customer's queries. We have highly skilled and expert support team, who makes use of modernized communication devices, thereby achieving maximum efficiency and an exceptional response time.

9. About SysInfoTools

Since several years, SysInfoTools has evolved as one of the trusted names in the field of Data Recovery of the different types of files. The main aim of our organization is to provide the best possible solution to our customers so that our customers can recover their data and relief them from the frustration of data loss. We aim at providing values to our customers and try to satisfy them in every possible way. Customer satisfaction is prime reward for our organization.

SysInfoTools provides a wide range of software for different types of corrupt files recovery and repair for corrupt zip files, MS BKF files, Open Office files (Base files, Impress files, Draw files, Calc files, Math files and Writer files), MS Office 2007 files (MS Word files, MS PowerPoint files and MS Excel files). SysInfoTools also provides software for corrupt PST files of MS Outlook and DBX files of Outlook Express. In addition, we have more recovery software which are available for crashed hard disk recovery and repair like software for FAT recovery and NTFS recovery. In future, we are going to expand our operations to offer more software for different types of corrupt files, Database, Email migration, Desktop utilities, Network management and many more which will help our customers to recover their valuable data.

The hard drives data recovery software provided by our organization ensures safe and accurate data recovery from the hard drive. It does not modify the existing content of the hard drive and make the fresh copy of the recovered data. Hard drives data recovery software are useful in situation when there is an accidental deletion of files, which are deleted due to virus attacks, disk formatting and software malfunctioning.
