1. SysInfotools Outlook Duplicate Remover

2. Overview

SysInfoTools Software presents its newly launched utility for removing all the duplicate items from Outlook PST files. The **Outlook Duplicate Remover** is an advanced way to remove duplicate emails, contacts, calendars, notes, tasks including the attachments from the Outlook PST files without causing any damage to the originality and integrity of the files. You can select multiple PST files at a time. The tool is smartly designed for both technical and non-technical users. Therefore, even a novice computer user can use this tool with ease.

Some key features of SysInfoTools **Outlook Duplicate Remover** tool are:

- Supports single as well multiple Outlook PST file at a time;
- Displays the file information of selected PST file (if single) automatically;
- Previews the mailbox data of selected PST file (if single) in a perfect tree structure;
- Provides option for searching duplicate items in same folder or across PST file;

- Date range feature provides two different options: **Predefined time period** or **define time period manually**;
- Allows users to select comparison criteria for removing particular type of duplicate items;
- Allows deletion of duplicate items from the original PST file;
- Creates a new PST file in which no duplicate items are stored;
- Highly interactive and user-friendly interface, i.e. no technical knowledge is required;
- Supports all major versions of Microsoft Outlook and Windows operating systems;
- Available with demo version for free evaluation purpose

Important notes:

- Make sure the PST files are not password-protected. If they are, try advanced **PST Password Recovery** tool of SysInfoTools Software unlock them.
- Make sure the PST files are not corrupted. If they are are, you need to repair them first. You can try advanced **PST File Repair** tool SysInfoTools Software.
