1. SysInfotools PDF Protection

SysInfoTools PDF Protection v3.0

2. Overview

SysInfoTools PDF Protection tool is an advanced desktop utility that applies password-protection as well as various security parameters on your PDF files. The tool supports user-password as well as owner-password on PDF files. It provides various encryption levels which can be applied on the PDF files. By using this tool, users can apply various security restrictions on their PDF file, such as: PDF printing (high & low resolution), content copying or extraction, document modification, authoring comments and form fields, document assembling, and many more.

Users can select single as well as multiple PDF files at a time. It displays Meta data properties and other information of PDF file which can be modified as per requirement. The tool contains an interactive graphical user-interface that works in a self-describing mode. It does not require any prior technical knowledge to use this tool. Even a novice user can use this tool with ease.

Some key features of SysInfoTools PDF Protection tool are:

- Supports single as well as multiple PDF files at a time;
- Displays Meta data properties and other information of PDF;
- Applies various types of encryption on PDF files;
- Support various security parameters which can be applied on PDF files;
- Applies user-password as well as owner-password on PDF files;
- Allows users to change the Meta data and other information of PDF files;
- Easy-to-use application, i.e. no prior technical expertise is required;
- Supports PDF files created in Adobe Acrobat 3.0 and later versions;

- Available with demo version for free evaluation purpose .

Important note:

Make sure the PDF file you choose, is not corrupt. The software does not support corrupt PDF files. If you have corrupted PDF files, first you need to repair them using advanced [PDF Repair](#) tool.

3. Getting Started

- [Installation Procedure](#)
- [Order And Activation](#)

3.1 Installation procedure

To install **SysInfoTools PDF Protection** tool, follow the steps given below:

1. Download demo version of the software setup (executable file or .exe) from the page linked below:

www.sysinfotools.com/recovery/pdf-protected.html

2. Double-click the setup to install the software on your system.
3. Follow the steps on the setup wizard to install the software.
4. After completion, the setup wizard will popup the message of setup completion on your computer screen.
5. Click **Finish** to launch the software on your system.

4. Order and Activation

- [How to Order](#)
- [How to Activate](#)

4.1 How to Order

The software can be purchased by making online payments. Click on the link shown below to have a look at the pricing details and to place an order.

www.sysinfotools.com/buynow/pdf-protected.html

Once the payment is received, an order number is sent to you via e-mail.

4.2 How to Activate

As you purchase the software, an Order Number is generated and provided to you. This order number has to be entered in the Registration window of the full version of **PDF Protection** tool.

- Open **SysInfoTools PDF Protection** software in your system, software registration dialog will pop-up on your screen to enter software authentication key.

- Click the "**I don't have Authentication Code**" check box, following fields will be displayed in the registration dialog:

Email Address: In this field, you need to enter your email address, which you have used to register **PDF Protection** software.

Order Number: In this field, you need to enter the Order Number which has been provided to you at the time of purchasing the software.

Path to save the file: Select the path where you want to save the .info file which is generated after clicking on "**Get Authentication Code**", by default .info file will be saved on desktop of your system.

Send this **.info file** generated by the software at sales@sysinfotools.com, after getting .info file sales department will send you software activation key within a couple of minutes.

For any software related queries email at: support@sysinfotools.com

You agree to hold SysInfoTools Data Recovery harmless from any and all claims or losses relating to such unauthorized use.

8. Technical Support

We provide 24/7 online support to solve customer's queries. We have highly skilled and expert support team, who makes use of modernized communication devices, thereby achieving maximum efficiency and an exceptional response time.

If you do not have any answer of your problems then contact our support team at: support@sysinfotools.com

9. About SysInfoTools

Since several years, SysInfoTools has evolved as one of the trusted names in the field of Data Recovery of the different types of files. The main aim of our

organization is to provide the best possible solution to our customers so that our customers can recover their data and relief them from the frustration of data loss. We aim at providing values to our customers and try to satisfy them in every possible way. Customer satisfaction is prime reward for our organization.

SysInfoTools provides a wide range of software for different types of corrupt files recovery and repair for corrupt zip files, MS BKF files, Open Office files (Base files, Impress files, Draw files, Calc files, Math files and Writer files), MS Office 2007 files (MS Word files, MS PowerPoint files and MS Excel files). SysInfoTools also provides software for corrupt PST files of MS Outlook and DBX files of Outlook Express. In addition, we have more recovery software which are available for crashed hard disk recovery and repair like software for FAT recovery and NTFS recovery. In future, we are going to expand our operations to offer more software for different types of corrupt files, Database, Email migration, Desktop utilities, Network management and many more which will help our customers to recover their valuable data.

The hard drives data recovery software provided by our organization ensures safe and accurate data recovery from the hard drive. It does not modify the existing content of the hard drive and make the fresh copy of the recovered data. Hard drives data recovery software are useful in situation when there is an accidental deletion of files, which are deleted due to virus attacks, disk formatting and software malfunctioning.

You can buy our products directly from SysInfoTools website. We provide software both by online mode and via shipment. The shipment is made within the committed time frame and at reasonable rates. We provide 24x7 customer support, our dedicated support team assists our customer by providing them information before and after the purchase of our product. We also provide the live working videos and free demo of our products at our SysInfoTools site so that the customer can see and analyze the software before purchasing it.
